

Progressive Web App

12 / 100

These audits validate the aspects of a Progressive Web App.

App can load on offline/flaky connections

Ensuring your web app can respond when the network connection is unavailable or flaky is critical to providing your users a good experience. This is achieved through use of a [Service Worker](#).

Has a registered Service Worker	No
URL responds with a 200 when offline	No
Cache contains start_url from manifest	No

Page load performance is fast

Users notice if sites and apps don't perform well. These top-level metrics capture the most important perceived performance concerns.

First meaningful paint	-1
Speed Index	-1
Estimated Input Latency	-1
Time To Interactive (alpha) (target: 1,700)	-1
Content scrolls at 60fps (Coming soon)	👉(ツ)👈
Touch input gets a response in < 150ms (Coming soon)	👉(ツ)👈
App is interactive without jank after the first meaningful paint (Coming soon)	👉(ツ)👈

Site is progressively enhanced

Progressive enhancement means that everyone can access the basic content and functionality of a page in any browser, and those without certain browser features may receive a reduced but not unfunctioning experience.

Page contains some content when its scripts are not available	Yes
---	-----

Network connection is secure

Security is an important part of the web for both developers and users. Moving forward, Transport Layer Security (TLS) support will be required for many APIs.

Site is on HTTPS	No
Site redirects HTTP traffic to HTTPS	No

User can be prompted to Add to Homescreen

While users can manually add your site to their homescreen in the browser menu, the [prompt \(aka app install banner\)](#) will proactively prompt the user to install the app if the below requirements are met and the user has visited your site at least twice (with at least five minutes between visits).

Has a registered Service Worker	No
Manifest exists	No
Manifest contains start_url	No
Manifest contains icons at least 144px	No
Manifest contains short_name	No

Installed web app will launch with custom splash screen

A default splash screen will be constructed, but meeting these requirements guarantee a high-quality and customizable [splash screen](#) the user sees between tapping the home screen icon and your app's first paint.

Manifest exists	No
Manifest contains name	No
Manifest contains background_color	No
Manifest contains theme_color	No
Manifest contains icons at least 192px	No

Address bar matches brand colors

The browser address bar can be themed to match your site. A theme-color [meta tag](#) will upgrade the address bar when a user browses the site, and the [manifest theme-color](#) will apply the same theme site-wide once it's been added to homescreen.

Manifest exists	No
Manifest contains theme_color	No

Design is mobile-friendly

Users increasingly experience your app on mobile devices, so it's important to ensure that the experience can adapt to smaller screens.

HTML has a viewport <meta>	No
Content is sized correctly for the viewport	No

Best Practices

These audits do not affect your score but are worth a look.

Accessibility: Element aria-* roles are valid	Yes
Accessibility: Element aria-* attributes are valid ARIA attributes	Yes
Accessibility: Background and foreground colors have a sufficient contrast ratio	No
▶ Elements must have sufficient color contrast	
Accessibility: Every image element has an alt attribute	No
▶ Images must have alternate text	
Accessibility: Every form element has a label	No
▶ Form elements must have labels	
Manifest: Manifest's short_name won't be truncated when displayed on homescreen	No
Manifest: Manifest's display property is set	No
UX: Service worker makes use of push notifications, if appropriate (Coming soon)	🔧
UX: Tap targets are appropriately sized for touch (Coming soon)	🔧
UX: Payment forms marked up with [autocomplete] attributes (Coming soon)	🔧
UX: Login forms marked up with [autocomplete] attributes (Coming soon)	🔧
UX: Input fields use appropriate [type] attributes for custom keyboards (Coming soon)	🔧

Performance Metrics

These encapsulate your app's performance.

Performance: Critical Request Chains

158

Longest request chain (shorter is better): **3**

Longest chain duration (shorter is better): **7225.69ms**

Longest chain transfer size (smaller is better): **117.79KB**

Performance: User Timing marks and measures

0

Progressive Web App

12 / 100

These audits validate the aspects of a Progressive Web App.

Offline

- Has a registered Service Worker
- URL responds with a 200 when offline

Manifest

- Cache contains start_url from manifest
- Manifest exists
- Manifest contains start_url
- Manifest contains icons at least 144px
- Manifest contains short_name
- Manifest contains name
- Manifest contains background_color
- Manifest contains theme_color
- Manifest contains icons at least 192px

Performance

- First meaningful paint (-1)
- Speed Index (-1)
- Estimated Input Latency (-1)
- Time To Interactive (alpha) (target: 1,700) (-1)

UX

- Content scrolls at 60fps (Coming soon)

JavaScript

- Page contains some content when its scripts are not available (true)

Security

- Site is on HTTPS
- Site redirects HTTP traffic to HTTPS

Mobile Friendly

- HTML has a viewport <meta>
- Content is sized correctly for the viewport

Best Practices

These audits do not affect your score but are worth a look.

- Accessibility:** Element aria-* roles are valid Yes
- Accessibility:** Element aria-* attributes are valid ARIA attributes Yes

Accessibility: Background and foreground colors have a sufficient contrast ratio **No**

► [Elements must have sufficient color contrast](#)

Accessibility: Every image element has an alt attribute **No**

► [Images must have alternate text](#)

Accessibility: Every form element has a label **No**

► [Form elements must have labels](#)

Manifest: Manifest's short_name won't be truncated when displayed on homescreen **No**

Manifest: Manifest's display property is set **No**

UX: Service worker makes use of push notifications, if appropriate (Coming soon) **No**

UX: Tap targets are appropriately sized for touch (Coming soon) **No**

UX: Payment forms marked up with [autocomplete] attributes (Coming soon) **No**

UX: Login forms marked up with [autocomplete] attributes (Coming soon) **No**

UX: Input fields use appropriate [type] attributes for custom keyboards (Coming soon) **No**

Performance Metrics

These encapsulate your app's performance.

Performance: Critical Request Chains **158**

Longest request chain (shorter is better): 3

Longest chain duration (shorter is better): 7225.69ms

Longest chain transfer size (smaller is better): 117.79KB
